

**It takes
Scottish bottle
to see a solution
not a problem**

Superglass Insulation: **Born and bred in Scotland**

We're immensely proud to be **Scottish**. We're also proud to be one of the UK's leading producers of glass mineral wool insulation, manufacturing it right here in **Stirling since 1987**. And equally proud that by doing so, we stop some of the UK's **2.4 million tonnes of waste glass** going to local landfill. Our glass mineral wool products are manufactured using recycled glass. In fact, every pack of Superglass insulation contains up to 84% recycled glass.

Our products have been given a Reaction to Fire A1 (non-combustible) – the highest possible rating. These non-combustible products can be used in most applications for domestic and commercial builds.

bimstore.co.uk

Building Information Modelling (BIM)

With legislation now in place to encourage the adoption of modern BIM workflows on all scales of project, Superglass have partnered with bimstore.co.uk to deliver high quality objects which can be downloaded from the Superglass website or www.bimstore.co.uk

Specification Support

At Superglass, we have earned a reputation for backing our first class product range and cutting edge manufacturing with the highest levels of customer support and service. We are therefore proud of our close relationships throughout the supply chain, and especially with specifiers who we support with a wide range of specialist technical services.

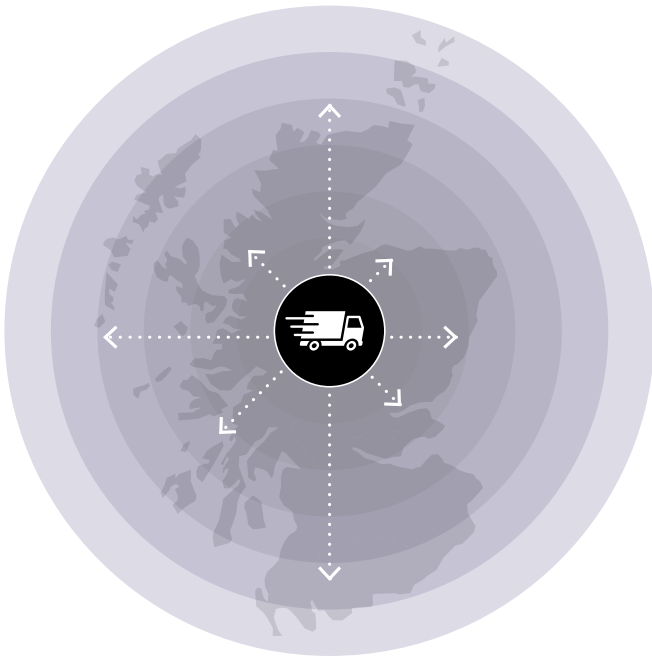

Our free and highly responsive specification service combines the skills of our external Specification Team and our dedicated in-house Technical Team to provide u-value calculations and dew point analysis.

Our teams will help you find the best solution for your application. And if that means a bespoke product is needed, they can design and produce it to your exact requirements as part of our SuperglassXtra service.

With outstanding levels of technical expertise and personal assistance, the Superglass Technical & Specification Teams can provide assistance with:

- **U-Value calculations**
- **Condensation risk analysis**
- **Building Regulation compliance**
- **Robust Details**

We've got Scotland covered

Your Superglass Contacts

We can arrange for supply of our product to all areas of Scotland through close working partnerships with our network of Superglass stockists. Please contact a member of our Scottish Team to discuss your query.
