

Supporting you as well as our planet.

THINKTECH is just part of our total
commitment to energy preservation.

But we're equally committed to giving you
the support you need, whatever your role
and wherever you use our products.

We're renowned for the highest levels of customer support and service, and proud of our close relationships throughout the supply chain – especially with specifiers.

Our free specification service combines the skills of our external Specification team with our dedicated in-house Technical team to provide U-Value calculations and Dew Point analysis. We also offer industry-leading Building Information Modelling (BIM) and Standard Assessment Procedure (SAP) guidance, with all our BIM objects downloadable from BIMstore.co.uk or directly from our website.

Whatever you need

Our team will help you find the best solution for your application. And if that requires a bespoke product, they can design and produce it to your exact requirements.

The Superglass Technical Team can help with:

- U-Value calculations, with dedicated on line calculation tool.
To access our free on line U-Value calculator visit www.superglass.co.uk/u-value-calculation
- Condensation risk analysis
- Building Regulations compliance
- Application and installation guidance
- Environmental and sustainability credentials

NBS Source  **NBS Source**
PARTNER

Superglass products now available on NBS Source. NBS Source is a brand-new platform that brings together the NBS BIM Library, NBS Plus and Product Selector.

NBS Source aims to help you find everything you need to make a decision in one place – product properties, certifications, associated literature, specification clauses and digital objects. With NBS Source, you will be able to add the Superglass products data straight into your NBS specification or design model in the click of a button.

Our products, bespoke or standard, carry all the accreditations you'd expect them to, including Declaration of Performance (DOPs), the reassurance of British Board of Agrément Certification (BBA) and UKCA certification, while for separating walls our Robust Detail solutions provide a simple and reliable route to compliance with the necessary Building Regulations.
