

Storage and care of Superglass products.

March 2024

How to store our insulation

Keep the product covered and fully wrapped on a pallet until required.

A wrapped pallet with its hood free from damage, can be left outside when space inside is not available, for short periods only.

Once the plastic hood has been removed keep all of the product inside and off the ground away from the elements.

Product should be kept elevated on a pallet at all times to avoid sitting water.

Product can become wet and damaged when exposed to the elements for long periods of time.

Loose product is extremely likely to have water damage when left in the rain rendering your stock unfit for sale.

Please note: This guide is suitable for all Superglass roll, slab and batt products. We do not recommend that Superglass pallets are double stacked.

Pallet Dimensions

Product	Length (mm)	Width (mm)	Height (mm)	Packs per Pallet
Superwall 32 Cavity Batt	1200	1200	2425	30
Superwall 34 Cavity Batt	1200	1200	2425	30
Superwall 36 Cavity Batt	1200	1200	2425	30
